Metal Bead Curtain

Metal bead curtain ismade ofhighquality metalbeads thatcan captureand reflect light to create an energetic, fantastic space atmosphere. No matter being used for art designs, building decoration, or acting as a simple, elegant curtain, metal bead curtain can easily blend into all kinds of environments. Meanwhile, metal bead curtain is a good solution that creates a perfect space divider without introducing a fixed partition. It not only adds the sense of beauty to the space, but also ensures people can pass through the curtain freely.

VANESSA CURTAIN 1987

Specifications

Category

Browse metal bead curtain and obtain unique, modern metal bead curtain category guidance.

Round & Faceted

Round and faceted beads have their own features. Round metal bead has a smooth surface and looks more gentle and is suitable for any building environments. Faceted metal bead has better refraction and scattering effects and is more suitable for stages and spaces with higher light effect requirements.

Round

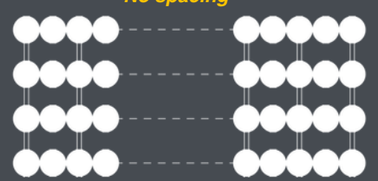

Faceted

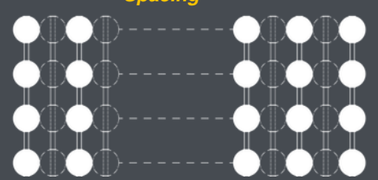

No Spacing & Spacing

Our metal bead curtain can be divided into no spacing and spacing types. We will adjust the space between metal metals based on the overall visual effect.

Architectural Flat Flex Belt

Architectural flat flex belt is a kind of metal mesh material formed by interlocking two adjacent metal wires together. In addition to being used as conveyor belt in factories, it can also act as decorative mesh for interior spaces. Due to its unique shape, it can provide unique visual effect for building facade, interior design and art devices. Meanwhile, it is made of rigid materials and is suitable for being installed in public areas with a large flow of people and plays a role of anti-theft. If you are looking for a unique and functional decorative wire mesh, architectural flat flex belt is a good choice.

Woven Wire Drapery

Woven wire drapery is akind ofmetal woven meshformed by crossbars passingthrough metal cables. Unlike other metal decorative mesh, woven wire drapery can only exhibit great flexibility in the vertical direction due to its unique weaving structure. When being used as building facade, it also plays the role of sun blocking and fall prevention & protection. Besides, it also shows its unique charm in interior decorations such as wall decoration, ceiling style design and space partition. We can offer a variety of weave types and finishes to make your personalized architectural design come into reality.
